3. 翻译

① Since the dawn of human ingenuity, people have devised ever more cunning tools to cope with work that is burdensome.

② As a result, the modern world is increasingly populated by intelligent gizmos whose presence we barely notice.

③ If robots are to reach the next stage of laborsaving utility, they will have to operate with less human supervision and be about to make a few decision for themselves.

④ But the human mind can glimpse a rapidly changing scene and immediately disregard the 98% that is irrelevant.
