（完全按应试教学法，带你高分带你飞）

我们学每一节课的目的是为了数月后在考研的考场上能够做题猛，否则我们的努力就成了“以考研的名义”自残。

宝宝们，这是《考研英语传奇背词班 7 大题材精讲》这个课的生态环境类第二篇课文的测试题。这一讲包含了以下考研英语考点，来，来，来，快来做做下面这些 **improving questions**，测一下你掌握了没？

1. 请准确理解下列词的含义

extinct	figures	overfishing
hook	conservative	acknowledge
bait	shark	whale
data	fishery	method
estimate	baseline	worm
predator	exploitation	shift
yield	outnumber	outweigh
notion	crop	relatively
theory	detect	current
vessel	proportion	trap
vase		

2. 请准确理解并译出下列词组

- ① on average
- ② attempt to do sth.
- ③ predator-prey relation
- ④ technological application
- ⑤ management efficiency
- ⑥ sustainable development
- ⑦ take into account
- ⑧ be saturated with...
- ⑨ be vulnerable to
- ⑩ suffer a great loss

3. 翻译句子

① Fish stocks in the past are underestimated, according to a latest paper published in *Nature*.

② Researchers hold that the young should adjust themselves to the changing situation.

③ Marine biologists argue that the large, slow-growing animals dropped faster than smaller species.

④ Most researchers fail to detect the massive changes which have happened in the ocean over time.

⑤ The catch sizes in new fisheries are about 80% of the original amount. The actual loss, in fact, is well below that record.

⑥ Technological application matters because theory suggests that the real difference between

⑦ present and past in fishing is that vessels can find their preys using satellites and sonar, which were not available half a century ago.

宝宝们，测试的目的是为了让大家巩固所学，并发现问题。做题过程中的查书、查笔记、冥思苦想，都是提高的过程。
