3. 翻译

① Even our schools are where we send our children to get a practical education—not to pursue knowledge for the sake of knowledge.

② Encouraging kids to reject the life of the mind leaves them vulnerable to exploitation and control.

③ Without the ability to think critically, to defend their ideas and understand the ideas of others, they can not fully participate in our democracy.

④ Practicality, common sense, and native intelligence have been considered more noble qualities than anything you could learn from a book.

⑤ Intelligence seeks to grasp, manipulate, re-order, and adjust, while intellect examines, ponders, wonders, theorizes, criticizes, and imagines.
