Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically. 1 a true cashless society is probably not aroun d the corner. Indeed, predictions have been 2 for two decades but hav e not yet come to fruition. For example, Business Week predicted in 1 975 that electronic means of payment would soon "revolutionize the ve ry 3 of money itself," only to 4 itself several years later. Why has the movement to a cashless society been so 5 in coming?

Although electronic means of payment may be more efficient than a payments system based on paper, several factors work 6 the disappear ance of the paper system. First, it is very 7 to set up the computer, card reader, and telecornmunications networks necessary to make elec tronic money the 8 form of payment Second, paper checks have the adva ntage that they 9 receipts, something that many consumers are unwilling to 10. Third, the use of paper checks gives consumers several days of "float" - it takes several days 11 a check is cashed and funds a re 12 from the issuer's account, which means that the writer of the check can cam interest on the funds in the meantime. 13 electronic payments arc immediate, they eliminate the float for the consumer.

Fourth, electronic means of payment may 14 security and privacy c oncerns. We often hear media reports that an unauthorized hacker has been able to access a computer database and to alter information 15 t here. The fact that this is not an 16 occurrence means that dishonest persons might be able to access bank accounts in electronic payments systems and 17 from someone else's accounts. The 18 of this type of fraud is no easy task, and a new field of computer science is develop ing to 19 security issues. A further concern is that the use of elect ronic means of payment leaves an electronic 20 that contains a large amount of personal data. There are concerns that government, employer s, and marketers might be able to access these data, thereby violatin g our privacy.

1. [A] However [B] Moreover [C] Therefore [D] Otherwise

- 2. [A] off [B] back [C] over [D] around
- 3. [A] power [B] concept [C] history [D] role
- 4. [A] reward [B] resist [C] resume [D] reverse
- 5. [A] silent [B] sudden [C] slow [D] steady
- 6. [A] for [B] against [C] with [D] on
- 7. [A] imaginative [B] expensive [C] sensitive [D] productive
- 8. [A] similar [B] original [C] temporary [D] dominant
- 9. [A] collect [B] provide [C] copy [D] print

10. [A] give up [B] take over [C] bring back [D] pass down
11. [A] before [B] after [C] since [D] when
12. [A] kept [B] borrowed [C] released [D] withdrawn
13. [A] Unless [B] Until [C] Because [D] Though
14. [A] hide [B] express [C] raise [D]ease
15. [A] analyzed [B] shared [C] stored [D] displayed
16. [A] unsafe [B] unnatural [C] uncommon [D] unclear
17. [A] steal [B] choose [C] benefit [D] return
18. [A] consideration [B] prevention [C] manipulation [D] just

19. [A] cope with [B] fight against [C] adapt to [D] call for

20. [A] chunk [B] chip [C] path [D] trail

Section II Reading Comprehension

Part A

Directions: Read the following four texts. Answer the questions a fter each text by choosing A, B, C or D. Mark your answers on ANSWER SHEET 1. (40 points)

Text 1

In an essay entitled "Making It in America", the author Adam Da vidson relates a joke from cotton about just how much a modern textil e mill has been automated: The average mill only two employees toda y, " a man and a dog. The man is there to feed the dog is there to ke ep the man away from the machines."

Davidson's article is one of a number of pieces that have recent ly appeared making the point that the reason we have such stubbornly high unemployment and declining middle-class incomes today is also be cause of the advances in both globalization and the information techn ology revolution, which are more rapidly than ever replacing labor wi th machines or foreign worker.

In the past, workers with average skills, doing an average job, c ould earn an average lifestyle, But, today, average is officially ove r. Being average just won't earn you what it used to. It can't when so many more employers have so much more access to so much more abov e average cheap foreign labor, cheap robotics, cheap software, cheap automation and cheap genius. Therefore, everyone needs to find their extra-their unique value contribution that makes them stand out in wh atever is their field of employment.

Yes, new technology has been eating jobs forever, and always wil 1. But there's been an acceleration. As Davidson notes," In the 10 years ending in 2009, [U.S.] factories shed workers so fast that they erased almost all the gains of the previous 70 years; roughly one ou t of every three manufacturing jobs-about 6 million in total -disappe ared. There will always be changed-new jobs, new products, new service s. But the one thing we know for sure is that with each advance in gl obalization and the I.T. revolution, the best jobs will require worke rs to have more and better education to make themselves above averag e.

In a world where average is officially over, there are many thing s we need to do to support employment, but nothing would be more impo rtant than passing some kind of G.I.Bill for the 21st century that en sures that every American has access to poet-high school education.

21. The joke in Paragraph 1 is used to illustrate____

[A] the impact of technological advances

[B] the alleviation of job pressure

[C] the shrinkage of textile mills

[D] the decline of middle-class incomes

22. According to Paragraph 3, to be a successful employee, one has to_____

[A] work on cheap software

[B] ask for a moderate salary

[C] adopt an average lifestyle

[D] contribute something unique

23. The quotation in Paragraph 4 explains that _____

[A] gains of technology have been erased

[B] job opportunities are disappearing at a high speed

[C] factories are making much less money than before

[D] new jobs and services have been offered

24. According to the author, to reduce unemployment, the most imp ortant is_____

[A] to accelerate the I.T. revolution

[B] to ensure more education for people

[C] ro advance economic globalization

[D] to pass more bills in the 21st century

25. Which of the following would be the most appropriate title fo r the text?

[A] New Law Takes Effect

[B] Technology Goes Cheap

[C] Average Is Over

[D] Recession Is Bad

Text 2

A century ago, the immigrants from across the Atlantic inclued se ttlers and sojourners. Along with the many folks looking to make a pe rmanent home in the United States came those who had no intention to stay, and 7millin people arrived while about 2 million departed. Abou t a quarter of all Italian immigrants, for example, eventually return ed to Italy for good. They even had an affectionate nickname, "uccel li di passaggio," birds of passage.

Today, we are much more rigid about immigrants. We divide nemcome rs into two categories: legal or illegal, good or bad. We hail them a s Americans in the making, or our broken immigrantion system and the long political paralysis over how to fix it. We don't need more cate gories, but we need to change the way we think about categories. We n eed to look beyond strick definitions of legal and illegal. To start, we can recognize the new birds of passage, those living and thriving in the gray areas. We might then begin to solve our immigration chal lenges.

Crop pickers, violinists, construction workers, entrepreneurs, en gineers, home health-care aides and physicists are among today's bir ds of passage. They are energetic participants in a global economy dr iven by the flow of work, money and ideas .They prefer to come and go as opportunity calls them , They can manage to have a job in one pla ce and a family in another.

With or without permission, they straddle laws, jurisdictions and identities with ease. We need them to imagine the United States as a place where they can be productive for a while without committing th emselves to staying forever. We need them to feel that home can be bo th here and there and that they can belong to two nations honorably.

Accommodating this new world of people in motion will require new attitudes on both sides of the immigration battle. Looking beyond th e culture war logic of right or wrong means opening up the middle gro und and understanding that managing immigration today requires multip le paths and multiple outcomes. Including some that are not easy to a ccomplish legally in the existing system.

26 "Birds of passage" refers to those who____

- [A] immigrate across the Atlantic.
- [B] leave their home countries for good.
- [C] stay in a foregin temporaily.
- [D] find permanent jobs overseas.

27 It is implied in paragraph 2 that the current immigration stys tem in the US____

- [A] needs new immigrant categories.
- [B] has loosened control over immigrants.
- [C] should be adopted to meet challenges.
- [D] has been fixeed via political means.
- 28 According to the author, today's birds of passage want____
- [A] fiancial incentives.
- [B] a global recognition.
- [C] opportunities to get regular jobs.
- [D] the freedom to stay and leave.

29 The author suggests that the birds of passage today should be treated $__$

- [A] as faithful partners.
- [B] with economic favors.
- [C] with legal tolerance.
- [D] as mighty rivals.
- 30 which of the best title for the passage?
- [A] come and go: big mistake.
- [B] living and thriving : great risk.
- [C] with or without : great risk.
- [D] legal or illegal: big mistake.

Text 3

Scientists have found that although we are prone to snap overreac tions, if we take a moment and think about how we are likely to reac t, we can reduce or even eliminate the negative effects of our quick, hard-wired responses.

Snap decisions can be important defense mechanisms; if we are jud ging whether someone is dangerous, our brains and bodies are hard-wir ed to react very quickly, within milliseconds. But we need more time to assess other factors. To accurately tell whether someone is sociab le, studies show, we need at least a minute, preferably five. It take s a while to judge complex aspects of personality, like neuroticism o r open-mindedness.

But snap decisions in reaction to rapid stimuli aren' t exclusive to the interpersonal realm. Psychologists at the University of Toron to found that viewing a fast-food logo for just a few milliseconds pr imes us to read 20 percent faster, even though reading has little to do with eating. We unconsciously associate fast food with speed and i mpatience and carry those impulses into whatever else we' re doing, S ubjects exposed to fast-food flashes also tend to think a musical pie ce lasts too long.

Yet we can reverse such influences. If we know we will overreact to consumer products or housing options when we see a happy face (one reason good sales representatives and real estate agents are always smiling), we can take a moment before buying. If we know female job s creeners are more likely to reject attractive female applicants, we c an help screeners understand their biases-or hire outside screeners.

John Gottman, the marriage expert, explains that we quickly "thi n slice" information reliably only after we ground such snap reactio ns in "thick sliced" long-term study. When Dr. Gottman really wants to assess whether a couple will stay together, he invites them to hi s island retreat for a muck longer evaluation; two days, not two seco nds.

Our ability to mute our hard-wired reactions by pausing is what d ifferentiates us from animals: doge can think about the future only i ntermittently or for a few minutes. But historically we have spent ab out 12 percent of our days contemplating the longer term. Although te choology might change the way we react, it hasn't changed our natur e. We still have the imaginative capacity to rise above temptation an d reverse the high-speed trend.

- 31. The time needed in making decisions may .
- [A] vary according to the urgency of the situation
- [B] prove the complexity of our brain reaction
- [C] depend on the importance of the assessment
- [D] predetermine the accuracy of our judgment
- 32. Our reaction to a fast-food logo shows that snap decisions____
- [A] can be associative
- [B] are not unconscious
- [C] can be dangerous
- [D] are not impulsive
- 33. To reverse the negative influences of snap decisions, we shou

1d .

- [A] trust our first impression
- [B] do as people usually do
- [C] think before we act
- [D] ask for expert advice
- 34. John Gottman says that reliable snap reaction are based on
- [A] critical assessment
- [B] ' 'thin sliced ' ' study
- [C] sensible explanation
- [D] adequate information

35. The author's attitude toward reversing the high-speed trend is .

- [A] tolerant
- [B] uncertain
- [C] optimistic
- [D] doubtful

Text 4

Europe is not a gender-equality heaven. In particular, the corpor ate workplace will never be completely family-friendly until women a re part of senior management decisions, and Europe's top corporate-g overnance positions remain overwhelmingly male .indeed, women hold on ly 14 percent of positions on Europe corporate boards.

The Europe Union is now considering legislation to compel corpora te boards to maintain a certain proportion of women-up to 60 percent.

This proposed mandate was born of frustration. Last year, Europe Com mission Vice President Viviane Reding issued a call to voluntary acti on. Reding invited corporations to sign up for gender balance goal of 40 percent female board membership. But her appeal was considered a failure: only 24 companies took it up.

Do we need quotas to ensure that women can continue to climb the corporate Ladder fairy as they balance work and family?

"Personally, I don't like quotas," Reding said recently. "But i like what the quotas do." Quotas get action: they "open the way to equality and they break through the glass ceiling," according to Reding, a result seen in France and other countries with legally bind ing provisions on placing women in top business positions.

I understand Reding's reluctance-and her frustration. I don't l ike quotas either; they run counter to my belief in meritocracy, gove rnment by the capable. Bur, when one considers the obstacles to achie ving the meritocratic ideal, it does look as if a fairer world must b e temporarily ordered.

After all, four decades of evidence has now shown that corporatio ns in Europe as the US are evading the meritocratic hiring and promot ion of women to top position— no matter how much "soft pressure" is put upon them. When women do break through to the summit of corpor ate power—as, for example, Sheryl Sandberg recently did at Facebook —they attract massive attention precisely because they remain the ex ception to the rule.

If appropriate pubic policies were in place to help all women---w hether CEOs or their children's caregivers--and all families, Sandbe rg would be no more newsworthy than any other highly capable person l iving in a more just society.

36. In the European corporate workplace, generally_____.

- [A] women take the lead
- [B] men have the final say
- [C] corporate governance is overwhelmed
- [D] senior management is family-friendly
- 37. The European Union's intended legislation is _____.
- [A] a reflection of gender balance
- [B] a reluctant choice
- [C] a response to Reding' s call
- [D] a voluntary action
- 38. According to Reding, quotas may help women _____.
- [A] get top business positions
- [B] see through the glass ceiling
- [C] balance work and family

[D] anticipate legal results

39. The author's attitude toward Reding's appeal is one of _____

[A] skepticism

[B] objectiveness

- [C] indifference
- [D] approval

40. Women entering top management become headlines due to the lac k of _____.

[A] more social justice

[B] massive media attention

- [C] suitable public policies
- [D] greater "soft pressure"

Part B

Directions:

You are going to read a list of headings and a text. Choose the m ost suitable heading from the list A-F for each numbered paragraph (4 1-45). Mark your answers on ANSWER SHEET1. (10 points)

- [A] Live like a peasant
- [B] Balance your diet
- [C] Shopkeepers are your friends
- [D] Remember to treat yourself
- [E] Stick to what you need
- [F] Planning is everything
- [G] Waste not, want not

The hugely popular blog the Skint Foodie chronicles how Tony bala nces his love of good food with living on benefits. After bills, Tony has \pounds 60 a week to spend, \pounds 40 of which goes on food, but 10 years a go he was earning \pounds 130,000 a I year working in corporate communicati ons and eating at London's best restaurants'" at least twice a week. Then his marriage failed, his career burned out and his drinking beca me serious. "The community mental health team saved my life. And I fe lt like that again, to a certain degree, when people responded to the blog so well. It gave me the validation and confidence that I'd los t. But it's still a day-by-day thing." Now he's living in a council f lat and fielding offers from literary agents. He's feeling positive, but he'll carry on blogging - not about eating as cheaply as you can - "there are so many people in a much worse state, with barely any mo ney to spend on food" - but eating well on a budget. Here's his advic e for economical foodies.

41.

Impulsive spending isn't an option, so plan your week's menu in a dvance, making shopping lists for your ingredients in their exact qua ntities. I have an Excel template for a week of breakfast, lunch and dinner. Stop laughing: it's not just cost effective but helps you bal ance your diet. It's also a good idea to shop daily instead of weekl y, because, being-human, you'll sometimes change your mind about what you fancy. 42 This is where supermarkets and their anonymity come in handy. Wit h them. there's not the same embarrassment as when buying one carrot in a little greengrocer. And if you plan properly, you'll know that you only need, say, 350g of shin of beef and six rashers of bacon, not whatever weight is pre-packed in the supermarket chiller. 43 You may proudly claim to only have frozen peas in the freezer - t hat's not good enough. Mine is filled with leftovers, bread, stock, meat an d fish. Planning ahead should eliminate wastage, but if you have surplus vegetable s you'll do a vegetable soup, and all fruits threatening to "go off' will be co oked or juiced. 44 Everyone says this, but it really is a top tip for frugal eaters. Shop at butchers, delis and fish-sellers regularly, even for small things, and be s uper friendly. Soon you'll feel comfortable asking if they've any knuckles of ham for soups and stews, or beef bones, chicken carcasses and fish heads for stock which, more often than not, they'll let you have for free. 45 You won't be eating out a lot, but save your pennies and once eve ry few months treat yourself to a set lunch at a good restaurant - ± 1.7 5 a week for three months gives you £21 - more than" enough for a three-course lunc h at Michelin-starred Arbutus. It's £16.95 there - or £12.99 for a 1 arge pizza from Domino's: I know which I'd rather eat. Section III Translation

Directions:

Translate the following text from English into Chinese. Write you r translation on ANSWER SHEET 2. (15 points)

I can pick a date from the past 53 years and know instantly where I was, what happened in the news and even the day of the week, I' ve been able to do this, since I was four.

I never feel overwhelmed with the amount of information my brain absorbs. My mind seems to be able to cope and the information is stor ed away neatly. When I think of a sad memory, I do what everybody doe s-try to put it to one side. I don't think it's harder for me just because my memory is clearer. Powerful memory doesn't make my emotio ns any more acute or vivid. I can recall the day my grandfather died and the sadness I felt when we went to the hospital the day of the we ek the day of the week day before. I also remember that the musical p lay Hair opened on Broadway on the same day-they both just pop into m y mind in the same way.

Section IV Writing

47. Suppose your class is to hold a charity sale foe kids in need of help. Write your classmates an email to

1) inform them about the details and encourage them to participat $\ensuremath{\mathsf{e}}$.

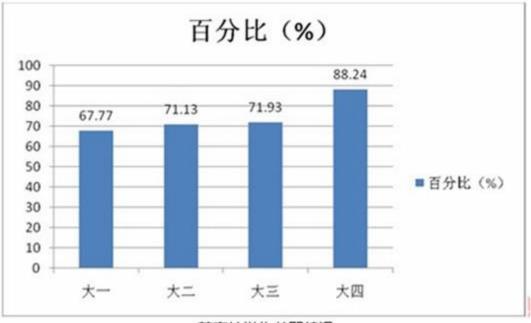

2) Don't use your own name, use "Li Ming" instead. Don't writ e your address. (10 points)

48. write an essay based on the following chart. In your writing, you should

1) interpret the chart and

2) give your comments

You should write about 150 words on the ANSWER SHEET .

某高校学生兼职情况
