Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

Happy people work differently. They're more productive, more creative, an d willing to take greater risks. And new research suggests that happiness might influence 1 firms work, too.

Companies located in place with happier people invest more, according to a recent research paper. 2, firms in happy places spend more on R&D(research and development). That's because happiness is linked to the kind of longer-term thinking 3 for making investment for the future.

The researchers wanted to know if the 4 and inclination for risk-taking th at come with happiness would 5 the way companies invested. So they compare d U.S. cities' average happiness 6 by Gallup polling with the investment activit y of publicly traded firms in those areas.

7 enough, firms' investment and R&D intensity were correlated with the h appiness of the area in which they were 8. But it is really happiness that's lin ked to investment, or could something else about happier cities 9 why firms the ere spend more on R&D? To find out, the researches controlled for various 10 that might make firms more likely to invest like size, industry, and sales-and and for indicators that a place was 11 to live in, like growth in wages or population. They link between happiness and investment generally 12 even after accounting for these things.

The correlation between happiness and investment was particularly strong f or younger firms, which the authors 13 to "less confined decision making proc ess" and the possible presence of younger and less 14 managers who are more likely to be influenced by sentiment." The relationship was 15 stronger in pla ces where happiness was spread more 16. Firms seem to invest more in place s.

17 this doesn't prove that happiness causes firms to invest more or to tak e a longer-term view, the authors believe it at least 18 at that possibility. It's not hard to imagine that local culture and sentiment would help 19 how execu tives think about the future. It surely seems plausible that happy people would be more forward -thinking and creative and 20 R&D more than the average," said one researcher.

Section II Reading Comprehension

Part A

Directions:

Read the following four texts. Answer the questions below each text by c hoosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

Text 1

It's true that high-school coding classes aren't essential for learning comput er science in college. Students without experience can catch up after a few int

roductory courses, said Tom Cortina, the assistant dean at Carnegie Mellon's S chool of Computer Science.

However, Cortina said, early exposure is beneficial. When younger kids le arn computer science, they learn that it's not just a confusing, endless string of letters and numbers - but a tool to build apps, or create artwork, or test hyp otheses. It's not as hard for them to transform their thought processes as it is for older students. Breaking down problems into bite-sized chunks and using c ode to solve them becomes normal. Giving more children this training could in crease the number of people interested in the field and help fill the jobs gap, Cortina said.

Students also benefit from learning something about coding before they ge t to college, where introductory computer-science classes are packed to the bri m, which can drive the less-experienced or-determined students away.

The Flatiron School, where people pay to learn programming, started as o ne of the many coding bootcamps that's become popular for adults looking for a career change. The high-schoolers get the same curriculum, but "we try to g ear lessons toward things they're interested in," said Victoria Friedman, an instructor. For instance, one of the apps the students are developing suggests movie s based on your mood.

The students in the Flatiron class probably won't drop out of high school and build the next Facebook. Programming languages have a quick turnover, s o the "Ruby on Rails" language they learned may not even be relevant by the time they enter the job market. But the skills they learn - how to think logica lly through a problem and organize the results - apply to any coding language, said Deborah Seehorn, an education consultant for the state of North Carolina.

Indeed, the Flatiron students might not go into IT at all. But creating a f uture army of coders is not the sole purpose of the classes. These kids are go ing to be surrounded by computers-in their pockets ,in their offices, in their ho mes -for the rest of their lives, The younger they learn how computers think, how to coax the machine into producing what they want -the earlier they learn that they have the power to do that -the better.

21.Cortina holds that early exposure to computer science makes it easier t

- [A] complete future job training
- [B] remodel the way of thinking
- [C] formulate logical hypotheses
- [D] perfect artwork production
- 22.In delivering lessons for high schoolers , Flatiron has considered their
- [A] experience
- [B] interest
- [C] career prospects
- [D] academic backgrounds

[A] help students learn other computer languages

[B] have to be upgraded when new technologies come

[C] need improving when students look for jobs

[D] enable students to make big quick money

24.According to the last paragraph, Flatiron students are expected to

[A] bring forth innovative computer technologies

[B] stay longer in the information technology industry

[C] become better prepared for the digitalized world

[D] compete with a future army of programmers

25.The word "coax"(Line4,Para.6) is closest in meaning to

[A] persuade

[B] frighten

[C] misguide

Text 2

[D] challenge

Biologists estimate that as many as 2 million lesser prairie chickens---a ki nd of bird living on stretching grasslands-once lent red to the often grey lands cape of the midwestern and southwestern United States. But just some 22,000 birds remain today, occupying about 16% of the species 'historic range.

The crash was a major reason the U.S. Fish and Wildlife Service (USFW S)decided to formally list the bird as threatened ."The lesser prairie chicken is in a desperate situation," said USFWS Director Daniel Ashe. Some environme ntalists, however, were disappointed. They had pushed the agency to designate the bird as "endangered," a status that gives federal officials greater regulatory power to crack down on threats .But Ashe and others argued that the" threaten ed" tag gave the federal government flexibility to try out new, potentially less confrontational conservations approaches. In particular, they called for forging c loser collaborations with western state governments, which are often uneasy with federal action, and with the private landowners who control an estimated 9 5% of the prairie chicken's habitat.

Under the plan, for example, the agency said it would not prosecute lando wner or businesses that unintentionally kill, harm, or disturb the bird, as long as they had signed a range-wide management plan to restore prairie chicken ha bitat. Negotiated by USFWS and the states, the plan requires individuals and b usinesses that damage habitat as part of their operations to pay into a fund to replace every acre destroyed with 2 new acres of suitable habitat. The fund will also be used to compensate landowners who set aside habitat, USFWS also set an interim goal of restoring prairie chicken populations to an annual average of 67,000 birds over the next 10 years. And it gives the Western Association of Fish and Wildlife Agencies (WAFWA), a coalition of state agencies, the

job of monitoring progress. Overall, the idea is to let "states" remain in the dr iver 's seat for managing the species," Ashe said.

Not everyone buys the win-win rhetoric. Some Congress members are trying to block the plan, and at least a dozen industry groups, four states, and three environmental groups are challenging it in federal court. Not surprisingly, doesn't go far enough. "The federal government is giving responsibility for managing the bird to the same industries that are pushing it to extinction, " says bi ologist Jay Lininger.

26. The major reason for listing the lesser prairie as threatened is_____.

[A]its drastically decreased population

[B]the underestimate of the grassland acreage

[C]a desperate appeal from some biologists

[D]the insistence of private landowners

27.The "threatened" tag disappointed some environmentalists in that it_____

_.

[A]was a give-in to governmental pressure

[B]would involve fewer agencies in action

[C]granted less federal regulatory power

[D]went against conservation policies

28.It can be learned from Paragraph3 that unintentional harm-doers will no t be prosecuted if they_____.

[A]agree to pay a sum for compensation

[B]volunteer to set up an equally big habitat

[C]offer to support the WAFWA monitoring job

[D]promise to raise funds for USFWS operations

29. According to Ashe, the leading role in managing the species in _____.

[A]the federal government

[B]the wildlife agencies

[C]the landowners

[D]the states

30.Jay Lininger would most likely support_____.

[A]industry groups

[B]the win-win rhetoric

[C]environmental groups

[D]the plan under challenge

Text 3

That everyone's too busy these days is a cliché. But one specific complain t is made especially mournfully: There's never any time to read.

What makes the problem thornier is that the usual time-management techni ques don't seem sufficient. The web's full of articles offering tips on making ti me to read: "Give up TV" or "Carry a book with you at all times." But in my experience, using such methods to free up the odd 30 minutes doesn't work. Sit down to read and the flywheel of work-related thoughts keeps spinning-or else you're so exhausted that a challenging book's the last thing you need. The

modern mind, Tim Parks, a novelist and critic, writes, "is overwhelmingly inc lined toward communication...It is not simply that one is interrupted; it is that one is actually inclined to interruption." Deep reading requires not just time, b ut a special kind of time which can't be obtained merely by becoming more e fficient.

In fact, "becoming more efficient" is part of the problem. Thinking of tim e as a resource to be maximised means you approach it instrumentally, judging any given moment as well spent only in so far as it advances progress towar d some goal. Immersive reading, by contrast, depends on being willing to risk inefficiency, goallessness, even time-wasting. Try to slot it as a to-do list item and you'll manage only goal-focused reading-useful, sometimes, but not the mo st fulfilling kind. "The future comes at us like empty bottles along an unstopp able and nearly infinite conveyor belt," writes Gary Eberle in his book Sacred Time, and "we feel a pressure to fill these different-sized bottles (days, hours, minutes) as they pass, for if they get by without being filled, we will have w asted them." No mind-set could be worse for losing yourself in a book.

So what does work? Perhaps surprisingly, scheduling regular times for reading. You'd think this might fuel the efficiency mind-set, but in fact, Eberle notes, such ritualistic behaviour helps us "step outside time's flow" into "soul time." You could limit distractions by reading only physical books, or on single purpose e-readers. "Carry a book with you at all times" can actually work, to o-providing you dip in often enough, so that reading becomes the default state from which you temporarily surface to take care of business, before dropping back down. On a really good day, it no longer feels as if you're "making time to read," but just reading, and making time for everything else.

- 31. The usual time-management techniques don't work because.
- [A] what they can offer does not ease the modern mind
- [B] what challenging books demand is repetitive reading
- [C] what people often forget is carrying a book with them
- [D] what deep reading requires cannot be guaranteed
- 32. The "empty bottles" metaphor illustrates that people feel a pressure to
- [A] update their to-do lists
- [B] make passing time fulfilling
- [C] carry their plans through
- [D] pursue carefree reading
- 33. Eberle would agree that scheduling regular times for reading helps.
- [A] encourage the efficiency mind-set
- [B] develop online reading habits
- [C] promote ritualistic reading
- [D] achieve immersive reading
- 34. "Carry a book with you at all times" can work if .
- [A] reading becomes your primary business of the day
- [B] all the daily business has been promptly dealt with

- [C] you are able to drop back to business after reading
- [D] time can be evenly split for reading and business
- 35. The best title for this text could be.
- [A] How to Enjoy Easy Reading
- [B] How to Find Time to Read
- [C] How to Set Reading Goals
- [D] How to Read Extensively

Text 4

Against a backdrop of drastic changes in economy and population structur e, younger Americans are drawing a new 21st-century road map to success, a latest poll has found.

Across generational lines, Americans continue to prize many of the same t raditional milestones of a successful life, including getting married, having chil dren, owning a home, and retiring in their sixties. But while young and old m ostly agree on what constitutes the finish line of a fulfilling life, they offer str ikingly different paths for reaching it.

Young people who are still getting started in life were more likely than o lder adults to prioritize personal fulfillment in their work, to believe they will advance their careers most by regularly changing jobs, to favor communities w ith more public services and a faster pace of life, to agree that couples should be financially secure before getting married or having children, and to maintain that children are best served by two parents working outside the home, the s urvey found.

From career to community and family, these contrasts suggest that in the aftermath of the searing Great Recession, those just starting out in life are defining priorities and expectations that will increasingly spread through virtually all aspects of American life, from consumer preferences to housing patterns to politics.

Young and old converge on one key point: Overwhelming majorities of b oth groups said they believe it is harder for young people today to get started in life than it was for earlier generations. While younger people are somewhat more optimistic than their elders about the prospects for those starting out today, big majorities in both groups believe those "just getting started in life" face a tougher a good-paying job, starting a family, managing debt, and finding aff ordable housing.

Pete Schneider considers the climb tougher today. Schneider, a 27-yaear-ol d auto technician from the Chicago suburbs says he struggled to find a job aft er graduating from college. Even now that he is working steadily, he said." I can't afford to pay ma monthly mortgage payments on my own, so I have to rent rooms out to people to mark that happen." Looking back, he is struck that his parents could provide a comfortable life for their children even though ne ither had completed college when he was young."I still grew up in an upper middle-class home with parents who didn't have college degrees, "Schneider sai d."I don't think people are capable of that anymore."

- 36. One cross-generation mark of a successful life is .
- [A] trying out different lifestyles

[B] having a family with children

- [C] working beyond retirement age
- [D] setting up a profitable business
- 37. It can be learned from Paragraph 3 that young people tend to .
- [A] favor a slower life pace
- [B] hold an occupation longer

[C] attach importance to pre-marital finance

- [D] give priority to childcare outside the home
- 38. The priorities and expectations defined by the young will .
- [A] become increasingly clear
- [B] focus on materialistic issues
- [C] depend largely on political preferences

[D] reach almost all aspects of American life

- 39. Both young and old agree that .
- [A] good-paying jobs are less available
- [B] the old made more life achievements
- [C] housing loans today are easy to obtain

[D] getting established is harder for the young

- 40. Which of the following is true about Schneider?
- [A] He found a dream job after graduating from college
- [B] His parents believe working steadily is a must for success

[C] His parents' good life has little to do with a college degree

[D] He thinks his job as a technician quite challenging

Part B

Directions:

Read the following text and answer the questions by choosing the most su itable subheading from the list A-G for each numbered paragraphs (41-45). Th ere are two extra subheadings which you do not need to use. Mark your answ ers on the ANSWER SHEET. (10 points)

- [A] Be silly
- [B] Have fun
- [C] Ask for help
- [D] Express your emotions.
- [E] Don't overthink it
- [F] Be easily pleased
- [G] Notice things
- Act Your Shoe Size, Not Your Age.
- (1) As adults, it seems that we're constantly pursuing happiness, often wit h mixed results. Yet children appear to have it down to an art-and for the mo st part they don't need self-help books or therapy. Instead, they look after their wellbeing instinctively and usually more effectively than we do as grownups. Perhaps it's time to learn a few lessons from them.

41_____[D] Express your emotions

(2) What does a child do when he's sad? He cries. When he's angry? He shouts. Scared? Probably a bit of both. As we grow up, we learn to control o ur emotions so they are manageable and don't dictate our behaviours, which is in many ways a good thing. But too often we take this process too far and e nd up suppressing emotions, especially negative ones. That's about as effective as brushing dirt under a carpet and can even make us ill. What we feel appropriately and then-again, like children-move on.

42____[F] Be easily pleased

A couple of Christmases ago, my youngest stepdaughter, who was 9 years old at the time, got a Superman T-shirt for Christmas. It cost less than a fiv er but she was overjoyed, and couldn't bigger house or better car will be the magic silver bullet that will allow us to finally be content, but the reality is t hese things have little lasting impact on our happiness levels. Instead, being gr ateful for small things every day is a much better way to improve wellbeing.

43____[**A**] **Be silly**

Have you ever noticed how much children laugh? If we adults could indu lge in a bit of silliness and giggling, we would reduce the stress hormones in our bodies, increase good hormones like endorphins, improve blood flow to our hearts and ever have a greater chance of fighting off infection. All of which would, of course, have a positive effect on our happiness levels.

44_____[**B**] Have fun

The problem with being a grownup is that there's an awful lot of serious stuff to deal with-work, mortgage payments, figuring out what to cook for din ner. But as adults we also have the luxury of being able to control our own d iaries and it's important that we schedule in time to enjoy the thing we love. Those things might be social, sporting, creative or completely random (dancing around the living room, anyone?)-it doesn't matter, so long as they're enjoyabl e, and not likely to have negative side effects, such as drinking too much alco hol or going on a wild spending spree if you're on a tight budget.

45_____ [E] Don't overthink it

Having said all of the above, it's important to add that we shouldn't try t oo hard to be happy. Scientists tell us this can back fire and actually have a negative impact on our wellbeing. As the Chinese philosopher Chuang Tzu is r eported to have said: "Happiness is the absence of striving for happiness." And in that, once more, we need to look to the example of our children, to who m happiness is not a goal but a natural byproduct of the way they live.

Section III Translation

Directions:

Translate the following text into Chinese. Write your translation on the A NSWER SHEET. (15 points)

The supermarket is designed to lure customers into spending as much time as possible within its doors. The reason for this is simple: The longer you st ay in the store, the more stuff you'll see, and the more stuff you see, the mor e you'll buy. And supermarkets contain a lot of stuff. The average supermarket, according to the Food Marketing Institute, carries some 44,000 different item s, and many carry tens of thousands more. The sheer volume of available choice is enough to send shoppers into a state of information overload. According to brain-scan experiments, the demands of so much decision-making quickly be come too much for us. After about 40 minutes of shopping, most people stop struggling to be rationally selective, and instead began shopping emotionally-which is the point at which we accumulate the 50 percent of stuff in our cart that we never intended buying.

【参考译文】

超市旨在吸引顾客在自己店内停留尽量长的时间。原因很简单:顾客在店里停留的时间越长,看到的商品就会越多;而看到的商品越多,你就会买的越多。超市有大量商品。根据食品营销研究院所说,普通超市大概有 44000 种不同的商品;很多超市更是会比普通超市多上万种商品。众多选择足以让顾客面临各种信息,不堪重负。根据脑部扫描实验,需要做这么多的决定很快就会使我们难以承受。大约购物 40 分钟以后,大部分顾客就无法试图做出理性的选择,而会冲动购物--此时,在购物车里,我们已经装了一半根本没想买的东西。

Section IV Writing

Part A

47. Directions:

Suppose you won a translation contest and your friend, Jack, wrote an em ail to congratulate you and ask for advice on translation. Write him a reply to

- 1) thank him, and
- 2) give you advice

You should write about 100 on the ANSWER SHEET.

Do not sign your own name at the end of the letter. Use Li Ming instea d.

Do not write the address. (10 points)

【参考范文】

Dear Jack.

Your letter of congratulations was received. Thank you for your nice word s on my winning the contest. In the letter, you asked me about the skills to d o translation, so the following are my advice for you.

Firstly, you should analyze the sentence structure, thus catching the meaning of the sentence. Secondly, find the proper words to translate the meaning of the source language into the target language. Thirdly, revise your translation at least three times to check if there are any mistranslations or missed meanings.

I hope my advice helpful. Wish to see you soon.

Yours sincerely,

Li Ming

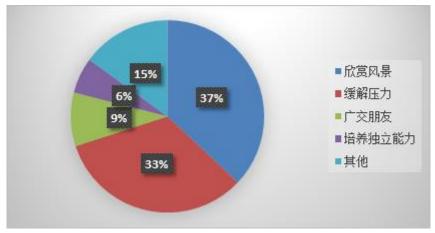

Part B

48. Directions:

Write an essay based on the chart below. In your writing, you should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15 points)

【参考范文】

Portrayed in the above pie chart is a survey of college students' purposes of traveling. The number of students who take traveling as a chance to see be autiful scenes accounts for 37%, while students who would like to travel to rel ieve pressure from study take up 35 %.

There are several reasons behind the trend revealed in the above chart. To begin with, as the present society is filled with fierce competition, most colle ge students nowadays are under great pressure to stand out among others or to lunch a decent job after graduation. Therefore, they tend to choose traveling a s an outlet to relieve their stress. Secondly, with the fast advancement of the l iving standards of Chinese families, traveling is increasingly affordable to most college students. For this reason, students prefer to travel to see different view s to enjoy themselves or to make some friends.

From my perspective, no matter what reason it is for, traveling is of great benefit for students to acquire a broader perspective of life. If time permits, we college students should go to see the outside world more often.
